Products

Skills:

Graphic Design, Type Design, Brand Design,
Font Development, Motion Graphics/Animation, Web Design.

What I do:

I design and build products for designers and creatives.

What I've done:

Started my design career in 2019, and worked on many freelance projects as a freelancer from 2019-2021 that can be found on my IG, but now I don't freelance anymore because I have switched from service to product, so from 2021-Present I'm working full time as a graphic designer for Billets via Your Digi Services (payroll company) and have so many side projects going on, from which the released ones are Nounty, Aextract, AEXTRACT 36, AEXPECTIVE, DSP#1

What I want to do next:

Work with agencies/companies I admire, where not only do I earn money, but also I learn, grow and make some amazing connections. Thank you.
